

 **LITRA**
Flexible. Responsive. Nimble.

Custom Fiber Optic & Copper Network Solutions

Pristine Products

We provide a total solution for your custom fiber optic, electronic and communication cable needs—ordering, assembly, testing, supply chain management, packaging, distribution and fulfillment. We build products locally, which means shorter lead times and ultra-fast, flexible, customized service. As a supplier of custom cable assemblies since 1986, customers rely on us to deliver what they need to get their job done on time and on budget.

Custom Cable Assemblies: We offer a full line of U.S. fiber optic, coaxial and category cables.

Responsive Services: With an extensive quality assurance and testing process, our team makes sure you receive exactly what you order.

Fast and Faster Delivery: We have the flexibility to fulfill special orders within 24-48 hours. No minimum required.

- ◆ Fiber Optic Cable Assemblies, 4 to 72+ fiber, any style.
- ◆ Singlemode Fiber Optic Jumpers
- ◆ Multimode Fiber Optic Jumpers
- ◆ Fiber Optic Accessories
- ◆ Fiber Attenuators
- ◆ Fiber Adapters
- ◆ Coaxial Cable Assemblies
- ◆ DS-3/DS-4 Coaxial Cables Assemblies
- ◆ LMR Jumpers
- ◆ Twisted-Pair Assemblies
- ◆ Terminated Cat5e/Cat6 Voice Grade Twisted-Pair Cables
- ◆ Data Cable Assemblies
- ◆ Data Communication and Instrumentation Cables
- ◆ Armored Fiber Assemblies
- ◆ Telco Assemblies

Never Wait on the Cable Guy Again

Flexible Services

Betcha Others Can't Do This

Not all manufacturers of custom fiber optic and electronic cables are equal. In fact, many are downright sub-par. Litra is the antidote to those guys. We designed our entire company around the concept of flexibility, responsiveness, and nimbleness to meet customer needs.

Services include:

- ◆ Ordering
- ◆ Assembly
- ◆ Testing
- ◆ Supply chain management
- ◆ Packaging
- ◆ Distribution
- ◆ Fulfillment

Start to Finish

- ◆ Re-termination & testing: refurbish damaged or suspect customer cables, especially broadcast, tactical and field test cables that are deployed and redeployed
- ◆ Kitting services: piece parts for inventory to complex sets of items for service trucks & freight rail
- ◆ Cable processing for sample evaluation
- ◆ Cable cutting and re-spooling
- ◆ Inventory, change and engineering control management
- ◆ Package design
- ◆ Distribution and fulfillment services
- ◆ Supply chain management from 3rd party suppliers for single point of distribution
- ◆ Control of finished goods to end-user destination

The Perfect Fiber Diet

Attitude Matters: We purposely designed our manufacturing culture around responsiveness and flexibility and take pride in being the most nimble provider of fiber optic, coaxial and category cables.

Responsive DNA: Nothing excites us more than getting a call from a customer with a totally unreasonable, completely impossible, cannot-be-done-in-this-universe request only to prove to them and ourselves that we can get it done. When you call, we respond.

Customized Mindset: Custom requests don't scare us – they inspire us to find the unique solution for a customer's needs. We speak engineer-ese with ease and turn needs into finished products quickly.

Total Quality: With gazillions in traffic flowing through the world's digital infrastructure, quality matters. Embedded in our DNA is the knowledge that every product we ship, every service we deliver, and every solution we offer is pristine in design and ready for deployment.

Committed Team: Our employees seriously take pride in knowing that we are the backbone behind your backbone.

Woman-Owned: We place a high value on making and sticking to commitments in helping clients integrate their systems on time and on budget.

Industries We Serve

- ◆ Telecommunications
- ◆ Data Centers
- ◆ Broadcast and Entertainment
- ◆ Utilities and Energy
- ◆ Transportation
- ◆ System Integrators
- ◆ Gaming

Time to Flex Your Muscle

Large Facility = Nimble, Responsive Production Capacity: You need it now...we can probably handle it. Our high-volume production facility can produce thousands of terminated cable assemblies and fiber connections per week. Volume production, private label and OEM are available from your single point of contact for interconnection solutions.

Bulk Inventory = Faster, Flexible Turnaround: You need it this week...we can get it there. We keep an extensive supply of inventory on hand at our 30,000 sq. ft. facility, allowing for shorter lead-times on large projects. We have the ability to assist engineers and project managers with last-minute requests for fast turn-around, depending on need and availability.

Precise Processes = Quality, Accurate Orders: Quality standards ooze throughout our organization. Constant review, training and documented processes ensure repeatability of all tasks. Our critical assembly areas are climate controlled. Our facility includes all aspects of our operations from raw materials receipt to shipment of orders, so nothing gets lost in transition.

U.S. Location = Improved Delivery Logistics: Located only a hop, skip and jump from the world's busiest airport in Atlanta, our facility is a convenient logistics gateway, decreasing the time required to ship orders across the United States and better transportation access to global markets.
